

# Quick userguide for AIS web statistic

## Select Mode

Define new statistics report

Export statistics report

Configure options

Configure graph options

Show jobqueue and list of generated reports

Online help

Log out

The screenshot displays the 'GateHouse Statistics' web application in a Windows Internet Explorer browser. The browser's address bar shows the URL 'http://webstat.ais.dk/webstat/'. The application interface includes a navigation menu with 'Statistics', 'Export', 'Options', and 'Configure Graph' tabs. The 'Statistics Selection' section features a 'Ship Report' dropdown menu. Below this, the 'Ship Report' section contains fields for 'Identification' (MMSI), a 'Search String' (minimum 3 digits), and date/time pickers for 'Start (UTC Time)' (10 Apr 2008 00:00) and 'End (UTC Time)' (10 Jul 2008 23:59). There are also checkboxes for 'Ignore Internal/External GPS changes' and 'Show Historical Track of Ship', along with 'Schedule Graph' and 'Save as Template' buttons. The main area is a map showing a ship's track with various colored markers and timestamps. A 'Colour Explanation' legend is visible on the right side of the map, defining the colors: red for 'Lost signal', green for 'Got signal', blue for 'Changed static data', and yellow for 'Changed voyage related data'. The map shows a track starting from the bottom left and moving towards the top right, with several points marked with colored circles and labeled with timestamps like '02/05 02:41', '04/05 06:52', '04/05 10:40', '02/05 06:48', '06/05 18:49', '02/05 11:44', '06/05 22:49', '09/05 01:12', '10/05 05:18', '09/05 06:00', '14/05 02:10', '02/05 16:05', '07/05 03:07', '07/05 08:06', '15/05 11:12', '02/05 21:00', '10/05 14:12', '03/05 25:26', '16/05 18:02', '17/05 02:10', and '04/05 03:11'. The browser's taskbar at the bottom shows the 'Internet' icon and a 100% zoom level.
